

# COMP1002 - Assignment One

Due Date: Feb 21st @11:59pm

Weight: 15%

I've created a simple HTML document, however, it's missing quite a few things include semantic code, ARIA roles to improve accessibility and styling. It also has quite a few errors!

Please help me fix this! You'll need to:

- 1.) validate and fix any identified code errors
- 2.) add more semantic markup to the code
- 3.) add ARIA roles to make it more accessible
- 4.) add simple styles (colour, fonts, typography) to make the webpage more aesthetically pleasing

Skills Demonstrated:

- understanding of valid HTML5 markup
- ability to use tools & resources to troubleshoot code errors
- understanding of the important of semantic code
- understanding of ARIA in order to improve accessibility

- ability to use simple CSS style rules in order to change colour & typography

	Getting There (0 - 1 mark)	Good Job ( 2 - 3 marks)	Awesomesauce ( 3- 4 marks)
